response services to organizations around the globe. As leading security services provider, it strives to build a safer digital society.

## Key figures

**25+**  
year

track record  
in information  
security

**24/7/365**

open day or night  
all year round

**3.000+**  
employees

based around  
the globe

**250+**

researchers  
and analysts

**220+**  
pentesters

of which 20%  
of the time is spent  
on research

**45 K**

rogue sites blocked  
per year

**60+**  
billion

logs and events  
ingested daily by threat detection  
platforms

**35+**

published papers  
and presentations

**18**  
SOCs

Security  
Operations  
Centers

**14**  
CyberSOCs

Cyber Security  
Operations  
Centers

## Detecting the threats you can't see

Orange Cyberdefense relies on threat intelligence research 365/24/7 and is powered by a strong combination of artificial and human intelligence-driven solutions. It combines market-leading technology with some of the industry's most talented experts, to provide you with the services you need to reduce your risk:

- **60+** billion events per day
- **129,395** detected incidents, resulting in **25,076** confirmed security incidents
- Hacking Companies of all sizes faced attacks, with malware representing **30%** of incidents.
- Large enterprises (**40%**) are impacted the most by Cyber Extortion, followed by small organizations (**25%**) and medium-sized businesses (**23%**).
- The Manufacturing sector (**32.43%**) is the largest contributor in terms of confirmed incidents, Retail Trade (**21.73%**) and Professional, Scientific and Technological Services (**9.84%**) completed the top three.
- **37.45%** of detected incidents originate from internal actors, whether deliberate or accidental.
- New research finds a new levelling of physical and cyber battlefields, revealing a thin line between physical war and cyber (through hacktivism)
- Europe was impacted by **85%** of all hacktivist attacks seen in 2023, followed by North America (**7%**) and the Middle East (**3%**).
- **109 CVEs** (Common Vulnerabilities and Exposures = public information about published security vulnerabilities) in 2023.

## Cybersecurity market and Orange Cyberdefense customers

- **11+ %** Orange Cyberdefense growth
- **8,700** customers worldwide

### Data protection and privacy lies at the heart of Orange Cyberdefense

More than of 25 year track record in information security, Orange Cyberdefense offers a global footprint anchored in Europe, which allows it to meet local requirements and international standards, ensuring data protection and privacy at the heart of its services.

Embedding security into Orange Business Services' solutions for multinationals worldwide, Orange Cyberdefense offers global protection with local expertise and support for customers throughout the entire threat lifecycle.

### Security Navigator Report

This annual research-driven report into the cybersecurity space provides a unique insight into the 'big picture' of cybersecurity. The report is produced solely by Orange Cyberdefense and is based 100% on first-hand information from its 18 global SOC's & 14 CyberSOCs, the CERT, Epidemiology Labs & World Watch. Gain invaluable insights into the threat landscape.

It includes expert reports and technology reviews on topics like Ransomware, Cyber Extortion and cybercrime. Check attack patterns and statistics for different business sizes and industries. Each annual report looks at the most disruptive events from that year with projections into future developments.
