

## Orange launches the new Livebox 7

Orange is launching the Livebox 7, compatible with XGS-PON<sup>1</sup>, which now offers fiber speeds of up to 5 Gbps downstream and 1 Gbps upstream for residential customers and 8 Gbps downstream and 2 Gbps upstream for business customers (subject to eligibility). At the same time, Orange is extending the use of Wi-Fi 6E to the vast majority of its customers, who will now be able to enjoy an optimized connection with a Livebox 6 up to the Livebox Up Fibre offer.

### High speeds and new offers for optimized connectivity

To meet the needs of the most demanding users, the new Livebox 7 allows all members of a household to benefit from the best Orange Wi-Fi experience (gaming, video, ultra-high definition TV...). Thanks to Wi-Fi 6E several devices can be connected simultaneously to one of the three available frequency bands to benefit from the high-speed and latency-free connection.

**For the residential customers**, the Livebox 7 is available as part of the Livebox Max Fibre plan, which has been upgraded to offer faster speeds: up to 5 Gbps downstream and 1 Gbps upstream. Livebox Max customers will continue to benefit from the Wi-Fi serenity to optimize their connection throughout the home (support by Wi-Fi specialists and up to three included repeaters).

The plan is priced at €39.99/month for six months, then €57.99/month for new customers.

Livebox Up Fibre customers can now enjoy the full power of the Livebox 6 and its Wi-Fi 6E with one repeater included. The Livebox Up Fibre plan is available from €33.99/month for six months, then €51.99/month.

**For business customers**, the new Livebox Pro Fibre and Open Pro Fibre plans<sup>2</sup> offer increased speeds: up to 2 Gbps upstream and 8 Gbps downstream. The specific configuration of the Livebox 7 allows you to benefit from two lines for voice and alarm applications, or to set up advanced services such as roaming VPN.

These offers also include:

- Triple backup (internet, voice and mobile) with continuous internet access via the mobile network (Airbox Confort Pro), a backup number so that customers do not lose any calls, and mobile rental (Open Pro Fibre plan).

---

<sup>1</sup> XGS-PON is a new fiber technology standard that stands for Ten (X) Gigabit Symmetric Passive Optical Network. It offers significantly faster download and upload speeds than existing fiber technologies.

- Installation of fiber and equipment, optimization of the internet connection and support for use via a 30-minute phone call with Orange experts.

For new Orange Fibre Pro customers, the Livebox Pro Fibre plan starts at €48 excl. VAT/month for 12 months, then increases to €55 excl. VAT/month.

### An eco-design approach certified by Bureau Veritas

The Livebox 7 is part of the **eco-design** approach recognized by the **Bureau Veritas “Footprint Progress”** certification. This is an internationally recognized certification body that bases certification solely on the product life cycle (mainly manufacturing, transport, distribution, customer use and end-of-life).

The Livebox 7 has been designed to be easily repairable, with a **100% recycled and recyclable cover**, and offers the option of setting a standby mode to reduce energy consumption.

*"Thanks to Wi-Fi 6E, which is available with the Livebox 6 and 7, our customers can now enjoy the best of Orange's networks. The Livebox 7 is more efficient meets the most demanding connectivity needs. Our eco-design approach has been, for the first time, certified by Bureau Veritas. We are once again at the forefront of innovation for the benefit of our customers"* says Jean François Fallacher, Executive Vice President and CEO, Orange France.

Offers subject to conditions with 12-month commitment in mainland France. Subject to eligibility to test on orange.fr or orangepro.fr. With compatible hardware (cables, computer and network card). Depending on the eligibility of the speed at the customer's address, maximum theoretical fiber speeds in the areas currently being deployed (up to 2 Gbit/s down and up to 1 Gbit/s up in other areas).

### About Orange

Orange is one of the world's leading telecommunications operators with sales of €43.5 billion in 2022 and 136,000 employees worldwide as at June 30, 2023, including 74,000 in France. The Group had a total customer base of more than 291 million customers on June 30, 2023, including 246 million mobile customers and 24 million fixed broadband customers. The Group is present in 26 countries. Orange is also a leading provider of global IT and telecommunication services to multinational companies under the brand Orange Business. In February 2023, the Group presented its “Lead the future” strategic plan, built on a new business model and guided by responsibility and efficiency. “Lead the Future” capitalizes on network excellence to reinforce Orange's leadership in service quality.

Orange is listed on Euronext Paris (symbol ORA) and on the New York Stock Exchange (symbol ORAN).
